Carlos Antonio González Canario

Senior Software Engineer — .NET / Backend Services
carlosantoniogonzalez@outlook.com | Spain
Nationality: Spanish citizen (EU)

PROFILE

Senior software engineer with 10+ years of experience designing, building and operating web applications and backend services, primarily in C#/.NET. Currently the senior backend engineer on a B2B media platform running in production on AWS: video upload and transcoding, transcription and subtitle editing, publishing workflows, and integrations with third-party machine translation and AI services. Experienced in modernising legacy systems (VB.NET/WebForms/SOAP to ASP.NET MVC/Core and REST), message-driven architectures, infrastructure as code and CI/CD, and in leading agile teams. Master's degree in Software Engineering for the Web.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript/TypeScript, SQL, PL/SQL, Go, HTML5/CSS
- **Backend & frameworks:** ASP.NET Core (8–10), ASP.NET Web API (REST), ASP.NET MVC, Entity Framework Core, Dapper, Node.js/Express, React.js, Redux
- **Messaging & integration:** MassTransit (RabbitMQ / Amazon MQ), AWS SQS/SNS, third-party API integrations, SOAP-to-REST migration
- **Cloud, DevOps & operations:** AWS (Lambda, S3, CloudFront, ECS/Fargate, MediaConvert, Transcribe), Microsoft Azure, Terraform, Azure DevOps, Jenkins, Travis CI, CircleCI, Git
- **Databases & data:** SQL Server, PostgreSQL, Oracle, MySQL; reporting with Microsoft Power BI
- **Quality & testing:** xUnit, Moq, Stryker.NET (mutation testing), Cypress
- **Systems & methods:** Linux (Ubuntu), Windows; Scrum (Certified Scrum Developer), technical leadership

PROFESSIONAL EXPERIENCE

Senior Software Engineer — TransPerfect, Spain — Feb 2023 – Present

- Senior backend engineer on a B2B multimedia platform (similar to Vimeo or YouTube) built with ASP.NET Core and C#, serving business customers in production.
- Develop and evolve the video upload and transcoding pipeline on AWS (S3, MediaConvert, Lambda, CloudFront) and the subtitle/transcription editing features (AWS Transcribe).
- Build the review-and-approval publishing workflow, bulk content management and attachment services.
- Integrate third-party services for machine translation and AI-generated chapters and dubbing, using asynchronous, message-driven processing (MassTransit over RabbitMQ / Amazon MQ, SQS/SNS).
- Contribute to reliability and delivery through automated testing (xUnit, Moq, Stryker.NET mutation testing), infrastructure as code (Terraform) and CI/CD pipelines (Azure DevOps), with containerised workloads on ECS/Fargate.

  Stack: ASP.NET Core 8–10, C#, EF Core, Dapper, SQL Server, MassTransit, AWS, Terraform, Azure DevOps

Software Engineer — Tally Governance (US, remote) — May 2021 – Feb 2023

- Delivered backend product increments every week for a US-based company, working in weekly sprints.
- Took part in company-wide and engineering team meetings to set weekly goals and report sprint results.

  Stack: TypeScript, Node.js, Express, Go, EntGo, PostgreSQL, React.js, Cypress, Web3/Ethereum, Solidity

Software Engineer (contractor) — Jobsity (US client, remote) — Aug 2020 – Apr 2021

- Delivered backend product increments every three weeks for a US-based client.
- Took part in Scrum ceremonies (planning, grooming, retrospectives) with the Scrum Master, Technical Lead and Product Manager.

  Stack: ASP.NET Core 3.1, C#, Entity Framework, PostgreSQL, SQL Server

Senior Software Engineer / Technical Lead — DGII – Dominican Republic Tax Administration — Aug 2019 – Aug 2020

- Technical lead in a team of 5 developers, 1 QA analyst, 1 requirements analyst and 1 project manager, delivering a BPMN-style web application (ASP.NET MVC 5, C#) in 3-week sprints. Led Scrum ceremonies with the Scrum Master.
- Migrated SOAP services written in VB.NET to RESTful APIs in C# with ASP.NET Web API.
- Built REST APIs in ASP.NET Core to serve Microsoft Power BI reports and filters to an ASP.NET Core MVC application.

  Stack: ASP.NET MVC 5, ASP.NET Core, Web API, C#, Oracle, PL/SQL, Power BI, jQuery, Webpack

Web Developer – Analyst — DGII – Dominican Republic Tax Administration — Oct 2017 – Jul 2019

- Migrated a legacy ASP.NET WebForms/VB.NET application to ASP.NET MVC 5 and C#.

- Built BPMN process modelling with dynamic forms generated from database rules, working in a team of 3 developers, 1 QA analyst, 1 requirements analyst and 1 project manager.
  Stack: ASP.NET MVC 5, C#, Entity Framework, Oracle, PL/SQL, jQuery, Node.js, Webpack

Earlier experience 2013 – 2017

- **Web Developer, Chrysalis Social & Digital Suite, Madrid** (Jun–Aug 2017): ASP.NET MVC 5 app to answer Metro de Madrid users across social media channels (WhatsApp, Twitter, Facebook).
- **Web Developer, DGII – Dominican Republic Tax Administration** (Sep 2014 – Oct 2016): migrated legacy VB.NET/WebForms apps to C# and ASP.NET MVC 4; self-service web tool to create and consume database reports.
- **Web Developer, Excellent Integrity Solutions** (Jun–Dec 2013): HR SaaS suite in ASP.NET MVC 4 and SQL Server, in a team of 5 developers.

EDUCATION & CERTIFICATION

Master's Degree in Software Engineering for the Web — Universidad de Alcalá, Spain 2017

Bachelor's Degree in Computer Science — Universidad Autónoma de Santo Domingo 2014

Certified Scrum Developer — Scrum Alliance (Badge ID 1043390) 2019

LANGUAGES

- **Spanish:** native
- **English:** professional working proficiency (spoken and written)
- **French:** committed to learning
